Dementia Friendly America

- Dementia Friendly America (DFA) launched at 2015 White House Conference on Aging
- Our goal is to catalyze a movement to more effectively support those living with dementia and their care partners
- Modelled after Minnesota’s ACT on Alzheimer’s
- Dementia Friends is a program within Dementia Friendly America that focuses on individual-level impact
- National Association of Area Agencies on Aging is fiscal agent and program administrator for DFA.

FUNDERS
The Growing Need

Impact on persons with disease and caregivers

By 2025, the number of people age 65 and older with Alzheimer’s disease and other dementias is estimated to reach 7.1 million — a 40 percent increase from the 5.1 million age 65 and older affected in 2015

Nearly 60% of people with dementia live in their own community homes

1 in 7 live alone
The Growing Need

Caregivers and families

In 2017 caregivers provided 18.2 billion hours of unpaid care, averaging 22 hours per week and valued at $230.1 billion annually.

The physical and emotional impact of dementia caregiving is estimated to have resulted in $10.9 billion in health care costs in the United States in 2017.

83% of all unpaid help provided to those with dementia comes from family members.
Unique Challenges in Rural Areas

• Difficulty accessing health services
• Transportation challenges
• Loneliness and social isolation
• Emergency situations
In Communities Across the Country

Goal is to have a DFA community in each state across the country and expand relationships with existing states/communities.
What is a Dementia Friendly Community

• A dementia friendly community is informed, safe and respectful of individuals with the disease, their families and caregivers and provides supportive options that foster quality of life.

• Joining DFA means a community is working to become more dementia friendly
Response to the Need

- Memory loss supports and services
- Legal and Financial Planning services
- Communities of faith
- Banking Institutions
- Transportation, housing, and public spaces
- Neighbors and community members
- Emergency planning and first response
- Independent living and community engagement
- Businesses and employers
- Care throughout the continuum
DFA Online Resources:
Community Toolkit, Sector Guides, Resources

Getting Started In Your Community
In utilizing the community toolkit, leaders and community organizers convene, engage, analyze and act together to foster dementia friendliness

A Dementia Friendly community is a village, town, city or county taking action to ensure people with dementia can live independently for as long as possible. It is a community where people living with dementia and their care partners will be able engage in a variety of activities and be supported in these activities. In a Dementia Friendly community, every part of the community plays a role and works together to create a dementia friendly culture.

Getting Started
Dementia Friendly America (DFA) communities foster change to support people with dementia and their care partners in local communities across the nation. Communities interested in joining the Dementia Friendly America network of communities file a pledge with DFA that their communities will include the following factors, as well as submit three letters of support that represent various sectors of communities.

How are other communities approaching this work?

• Each community will decide the approach that best fits their needs:

• What is a community?
  – Self-defined: city, town, county, state, etc
  – If state, state works with local communities for implementation, often serving in direct TA role
Sample Community Actions

• Offering training to faith communities

• Request library/ mobile library include dementia friendly materials
Sample Community Actions

- Hosting memory cafes for people with memory loss and caregivers
- Partner with local schools
- Working with local restaurant(s) for dementia friendly dinners once a month
Sample Community Actions

- Working across key groups to support vulnerable rural residents during adverse weather
- Collaborating with law enforcement on training, ID bracelet, or file of life initiatives
Alignment with Age-Friendly

Age and Dementia Friendly Communities

Since age is the greatest risk factor for dementia, communities working towards age-friendly resources may want to consider adding dementia friendly elements to their efforts. The list below shows dementia friendly elements that communities may want to consider adding to their age-friendly efforts.
